

The Management of the company **EUROMON, PLV**, is committed to applying a Quality and Environmental Policy implemented within the framework of a Quality and Environmental Management System in accordance with the ISO 9001:2015 and ISO 14001:2015 standards, respectively, and which covers all the people and areas of the organisation, its scope being "Design and management of the manufacture of permanent displays at the point of sale", with the mission of offering a wide variety and models: floor, counter, illuminated, promotional, interactive, etc., and in all types of materials: metal, plastic, glass, wood, etc., in order to achieve constant improvement and continue to make progress in terms of the level of technology. and in all types of materials: metal, plastic, glass, wood, etc. in order to achieve constant improvement and continue to advance in terms of the level of technology; it is applied in its facilities in Molins de Rei (Calle de Miquel Torelló i Pagès, 28, 08750 Molins de Rei, Barcelona).

EUROMON, PLV approaches the Integrated Quality and Environment System as a way of organising the operation of the company based on the basic pillars of product quality, the satisfaction of interested parties, as well as the management of environmental aspects, emergencies, risks, legal requirements and the continuous improvement of the efficiency of the System. To this end, **EUROMON, PLV**'s IMS is based on the following:

- The main lines of the Integrated Quality and Environmental System are reflected in the Quality-Environment Manual, which is conceived as a result of a periodic analysis of our context and analysis of risks and opportunities. This means that the integrated policy acquires a strategic vision of the company and it is for this reason that compliance with it is declared obligatory, with all personnel assuming the responsibilities defined therein.
- The strategic line of the organisation, which is committed to complying with the environmental legislation and regulations applicable to our activities, and to the health and safety prevention applicable to our workers (including the monitoring of prevention protocol guidelines against the SARSCoV-2 Coronavirus), as well as with other commitments that may be established in this regard, striving to continuously improve our environmental performance.
- Promote an efficient use of available natural resources and continuously intensify our environmental management to achieve improvements in the overall performance of the company, with a focus on life cycle analysis, environmental protection and pollution prevention.
- Identify and control the organisation's environmental aspects and risks, so that we establish a preventive approach.
- The publication, on an annual basis, of the Quality and Environmental objectives, making them extensive to all personnel; these must be well known and assumed so that the daily tasks lead to their achievement in the shortest possible time.
- Train and sensitise the organisation's staff on environmental performance, as well as provide the necessary resources for the proper functioning of the environmental system.
- The available technical and scientific knowledge and appropriate practices for the prevention of environmental pollution and the minimisation of environmental impact in all processes and services, and the environmental pollution and the minimisation of environmental impact in all processes and services, striving for continuous improvement of environmental quality.
- Training in all areas that are specific to them, both in the technical and administrative, commercial and environmental branches, thus being able to achieve greater staff motivation and greater involvement in achieving the objectives.
- The commitment to pay the utmost attention to technological evolution and to the possible improvements that new technologies make available to us, including the commitment of our suppliers to the services they provide us with.

EUROMON, PLV understands that the Quality of the company is based on Customer Satisfaction, on the Continuous Improvement of the efficiency of the system and on respect for the the efficiency of the system and respect for the Environment, always with the maximum Prevention and Health Safety of our workers. our workers.

The Management will maintain a systematic system for the identification of training needs and its planning, aimed at guaranteeing the compliance of our personnel with this policy.

In this sense, Quality and Environmental Management requires the participation and collaboration of everyone. This Policy is disseminated to all interested parties, and in particular, to all the company's personnel for their knowledge and understanding. knowledge and understanding.

Management, Molins de Rei, June 28, 2021
